

RespSafety

for businesses

Instant online OSHA-compliant respirator clearances

RespSafety offers a convenient online respirator medical evaluation solution to help employers protect their employees and meet OSHA requirements in a cost-efficient way.

Background

Before wearing a tight-fitting respirator, OSHA requires that workers must first be medically evaluated using the mandatory medical questionnaire in Appendix C of the Respiratory Protection standard. Employers must ensure that the medical questionnaire is administered confidentially during the employee's normal working hours or at a time and place convenient to the employee, and the employer must not review the employee's responses. Respirator Protection is one of the top 5 most cited OSHA violations, but many companies ignore the requirement due to the cost, inconvenience and potential liability associated with conducting confidential medical evaluations.

Why Choose RespSafety?

Easy Onboarding

Your team will automatically be invited to complete the medical evaluation online in either English or Spanish

24/7 Online Convenience

Employees complete the questionnaire at their convenience, saving on travel time, labor expenses, and reducing potential liability

Fast and Efficient

Our intuitive web interface, machine learning algorithm and instant approval process makes online testing easier and faster than ever

Kiosk Mode

Allows employees to complete the questionnaire using a shared computer and without entering an email address

Cost Effective

Simple and transparent pricing. Pay only for what you use with no monthly fees or hidden charges

Designed for Companies

Add, assign, and archive employees. Automatically send reminder notices to employees when renewals are due

OSHA Compliant & Secure

Our medical evaluations cover all respirator types and meet OSHA Standard 29 CFR 1910.134 and HIPAA security requirements

Flexible Data Management

Get all the info you need in seconds. Download a spreadsheet with employee status or approval letters in PDF
